

SwingerViewer is a sophisticated way for clients to take home the content of their lessons. Designed to work exclusively with files created in Swinger, SwingerViewer will:

- Display high quality, full resolution video
- Allow full control of the video clip - frame by frame, slow motion etc.
- Display all graphics and text that a coach/ teacher has added
- Play Lesson files created in SwingerPlus

SwingerViewer is delivered on a customised CD which can be designed to promote your business and include links to websites, email or other electronic information. It is designed to run on Windows 98SE, NT4, 2000 and XP. All you have to do is add the video clips and or Lesson files.

Both the CD label and on-screen display can be customised and the CDs are designed to automatically start when the client inserts the disk. As SwingerViewer can only be run from the CD, it means the client will see any promotional material every time they use it!
